Re: RouteOne SOC Reports Bridge Letter

We are providing this letter in connection with the RouteOne's service auditors' reports on controls placed in operation and test of operating effectiveness for both:

- SOC 1 Type II Report on the Suitability of the Design & Operating Effectiveness of Controls throughout the Period October 1, 2024, to September 30, 2025.
- SOC 2 Type II Report - Report on Controls at a Service Organization Relevant to Security, Availability, and Privacy throughout the Period October 1, 2024, to September 30, 2025.
- SOC for Cyber Security Report on RouteOne LLC's Description of its Cybersecurity Risk Management Program and the Effectiveness of Controls within the Program Throughout the Period October 1, 2024, to September 30, 2025

We recognize that, as members of management of RouteOne LLC, we are responsible for the fair presentation of the description of RouteOne LLC's controls and for establishing and maintaining appropriate controls for the RouteOne.net web site and related services for client organizations.

We believe the description of controls provided in the service auditors' report presents fairly, in all material respects, those aspects of RouteOne LLC's controls that may be relevant to client organizations' internal control for the period of October 1, 2024, to September 30, 2025.

We are not aware of any changes to the control environment during the period of October 1, 2025, to December 31st, 2025, that would have a material adverse effect on the description of controls as described in the service auditors' reports.

Sincerely,

Spencer Loch
Manager, Governance Risk and Compliance
